

Calm. Dense. Legible at a glance.

Inter is the UI typeface; JetBrains Mono carries IDs, codes, and monospace data. The scale runs small (11–24px) by intent — clinical screens pack vital information into table rows and dashboard cells, not magazine spreads.

SCALE			
--text-2xl	24 / 700	Patient Records — ICU-4B	Page title
--text-xl	20 / 600	Active medication orders	Section header
--text-lg	18 / 600	Vital signs — last 6 h	Widget / card group
--text-md	16 / 700	Sarah Mitchell, 62F	Card title · clinical emphasis
--text-base	14 / 400	Hemodynamically stable but mild desaturation. Possible early fluid overload — request cardiology consult.	Body, default
--fs-table	13 / 500	Heparin drip · 1000 u/h · started 14:32	Table cell (helper)
--text-sm	12 / 700	ORDER LABS	Button label, badges
--text-xs	11 / 500	Updated 12 min ago by Dr. Chen	Metadata, captions
--fs-tiny	10 / 500	CRITICAL · ICU · BED 12	Eyebrow / pill labels (helper)

WEIGHTS

Regular 400 — body Medium 500 — table cell SemiBold 600 — section Bold 700 — title, button

NUMERALS

96 bpm 142/88 mmHg 94% SpO₂ 38.6 °C 0123456789

Tabular numerals (font-feature-settings: 'tnum') on every numeric column. Vitals, lab values, dosages — anything a clinician scans down a column.

JETBRAINS MONO — DATA & IDENTIFIERS

MRN A-0042199 · NDC 0071-0156-23 · ICD-10 I21.4

96 bpm 142/88 mmHg 94% SpO₂ 38.6 °C

0123456789 — slashed zero, fixed width, unambiguous in dosing

JetBrains Mono (--font-mono) for MRNs, drug codes, and any value where character ambiguity is a safety risk. --font-size-clinical bumps vitals to 16px.

Color is information.

Indigo navy and teal carry the brand. The five clinical tiers carry severity. Neutrals carry everything else — about 70% of every screen.

CLINICAL SEVERITY — THE HEALTHCARE TOKEN SCALE

Five tiers, each a triplet: solid foreground + tinted -bg + -border. This is the canonical scale for triage, drug interactions, alerts, and patient status — use the named tier literally, never an amber-by-eye. Tailwind-derived for consistent contrast in light and dark.

⚠ CRITICAL

Immediate action — code, contraindication, crashing vitals.
--clinical-critical · #DC2626

⚠ URGENT

Act this shift — major interaction, deteriorating trend.
--clinical-urgent · #EA580C

⚡ CAUTION

Monitor — moderate interaction, watch parameters.
--clinical-caution · #CABA04

✓ STABLE

Within range — minor interaction, normal vitals.
--clinical-stable · #16A34A

i INFO

FYI — pending result, scheduled, informational.
--clinical-info · #1D4ED8

Built directly from the clinical Figma library.

DRUG-INTERACTION ALERTS — 4 SEVERITIES × 2 STATES

Mapped onto the clinical token scale: minor → **stable**, moderate → **caution**, major → **urgent**, contraindicated → **critical**.
Tinted background, solid foreground, 4px left accent.

Minor: Omeprazole + Calcium

May reduce calcium absorption. Space doses by 2+ hours.

Recommendation:

Monitor calcium levels at next routine labs.

View details

Override

Dismiss

Moderate: Metformin + Lisinopril

May increase hypoglycemia and lactic acidosis risk.

Moderate: Metformin + Lisinopril

May increase hypoglycemia and lactic acidosis risk.

Recommendation:

Monitor renal function and glucose levels weekly.

View details

Override

Dismiss

Major: Warfarin + Aspirin

Significantly increased bleeding risk.

Major: Warfarin + Aspirin

Significantly increased bleeding risk.

Recommendation:

Monitor INR closely. Consider alternative antiplatelet.

74

97%

Category	Value
AI Confidence	92%
Differential — top dx	76%
Drug suggestion	58%

When confidence is below 70 %, the gradient swaps to amber and the recommendation surfaces a "Review with clinician" inline action. The bar never reads green; clinicians decide, AI suggests.

BRAND

Simplify.

A wordmark in indigo navy with a teal “+” cross — a clinical mark hidden inside the “y”. The mark stands alone at small sizes; the wordmark carries the brand surface.

WORDMARK

logo.svg · primary · light surface

logo-white.svg · reversed · indigo / dark

MARK

logo-icon.svg · 24 px min

logo-icon-white.svg

favicon · 32 px

favicon · 16 px

CLEAR SPACE

Clear space equals the height of the cross stem on all four sides. Don't crowd, don't overlap.

DO / DON'T

✓ DO

Use the wordmark on white or very light gray. Indigo + teal stay legible.

✗ DON'T

Don't place the mark on busy gradients or photos without a solid backplate.

✓ DO

✗ DON'T

Reverse to white on indigo navy or any dark surface.

Don't recolor or apply gradients. The wordmark is two solid colors.
